

Bees pollinate 1 in 3
mouthfuls of the food we eat
and they need our help !

This is a Bee Friendly Garden

Actforbees.org

No Pesticides or Insecticides used here

My seeds are organic !

My garden has lots of flowering herbs,
flowers and native plants for Bees to enjoy
their nectar all year long.

Ground cover helps the native bees make
homes.

The Bees can drink from shallow bowls of
water with pebbles for them to land on.
