

# Little Green Steps WA & Australian Association for Environmental Education (WA Chapter)

presents:

## Biodiversity Awareness and Actions in Early Years Settings

Wednesday 14 September 2022,  
2.00PM – 4.30PM

Piney Lakes Environmental Education Centre,  
Leach Highway & Murdoch Dve, Winthrop

**Early Years Educators passionate about engaging children in nature and biodiversity awareness will love this workshop.**

Birds, bees, bats and all living things.... learn how to embed biodiversity awareness into the day to day of your education and care setting. This gives children agency to make a difference by protecting and conserving biologically diverse environments.

### We will cover:

- Fun, hand-on activities for children (and educators!) to take action for Biodiversity.
- Introduce Citizen Science projects to take whole centre action.
- Links to the National Quality Standard and the Early Years Learning Framework.
- Opportunities to network with other early childhood professionals.

This workshop is heavily subsidised for educators in the City of Melville.

*"Thank you for getting me motivated!"*
