

Little Green Steps WA & Australian Association for Environmental Education (WA Chapter)

presents:

Developing Child Agency to affect Built Environments in Early Years Settings

Wednesday 7 June 2023

5.30pm – 8.00pm

Coolbellup Community Hub Family Day Care Service
90 Cordelia Avenue, Coolbellup WA

This workshop from Little Green Steps WA will provide Early Years Educators with a foundational understanding to share the economics of life in Early years settings.

We can weigh up what we buy and don't buy & share the reasons we do so with children. Making choices each day about the goods and services we wish for is a sustainable life skill worth sharing in the early years.

We will also engage child agency to explore the physical, urban and natural spaces children want to learn in and to future proof our world.

Workshop Includes:

- Ideas and inspiration for involving children in practical activities and routines
- New resources
- Links to the EYLF and NQS
- A chance to connect with other early years professionals and share ideas.
